Art Unit: 3662

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, 46-67, 75-112, drawn to a system and a method for collecting a Global Positioning System ("GPS") almanac with a partial almanac collection system ("PACS").
 - II. Claims 39-45, 68-74, drawn to a partial almanac collection system in signal communication with a call processor.
2. Inventions group 1 and group 2 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group 2 has separate utility such as in a system and a method without downloading the almanac.
3. Inventions group 1 and group 2 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group 1 has separate utility such as in a system without means for instructing the GPS module to collect piece almanac data.
4. Because these inventions are distinct for the reason given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
